

Ideation Phase

Define the Problem Statements

Date	01/10/2026
Team ID	SWTID-2026-2467
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Write a clear statement from the customer's perspective. This template helps identify the needs that should guide an experience people find useful and satisfying.

A focused customer problem statement gives the team a stronger basis for addressing real challenges. Developing it also encourages empathy and helps clarify how customers experience the product or service.

Project Problem Statements:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	IT Support Staff	handle newly submitted incident tickets	a new ticket may have no Category value	the Flow starts when an Incident Workflow record is created without a Category	unsure how the ticket will be categorized and routed
PS-2	Ticket Requester	report an IT issue and receive timely support	the incident record can begin without a category	the workflow is triggered by an empty Category field and then checks its configured conditions	uncertain whether the issue will be classified before support begins
